

How To Setup Exchange On Iphone/Ipad.

First click the settings icon

Then scroll down to where it says mail contacts etc click on mail,contact, calender...

Add Mail Account

Then click add mail account.

 Exchange

then select exchange

Once on this page you will see blank boxes like the ones below. Now type in your Email and password and click next

<input type="button" value="Cancel"/>	Exchange	<input type="button" value="Next"/>
<hr/>		
Email	<input type="text"/>	
Password	<input type="password"/>	
Description	Exchange	
<hr/>		

Then click save and your all set if you however if you have a new Email address and this is the first time setting it up you shouldn't have any mail in your inbox, but if it is one you have used before give it a few minutes to sync up. Once done, go back into the mail account and change the "Mail Days to Sync" to "No Limit" else you may only see the last 7 days of emails.

If your still having issues, please contact us and we can provide you a quote to help you set it all up or do it for you if your one our customers.
